■ **Most founders spend twelve months figuring out what seven focused days would have solved.** Aarambh is not a course, a consulting retainer, or a template pack. It is one operator — twenty-five years across four industries and thirty-eight countries — sitting in your office for seven consecutive days, building your business with you from zero to running. Tailored, one-to-one, nothing generic, nothing pre-packaged.

THE SEVEN DAYS

70 HRS • YOUR LOCATION • ALL OUTPUT IS YOURS

DAY 1

Foundation & Diagnosis

Business model, market thesis, competitive landscape. What you're actually building vs what you think you're building. Full audit. No flattery.

DAY 2

Legal & Structural Scaffolding

Entity structure, ABN/ACN, banking, contracts, IP protection. The infrastructure layer most founders skip and later regret.

DAY 3

AI Stack & Operations

Full AI orchestration setup tailored to your business — automation, workflows, content pipelines. 100+ frameworks drawn from live deployments.

DAY 4

Product & Build

MVP architecture, prototype build or production-ready specification — depending on where you are. Something real exists by Thursday.

DAY 5

Go-to-Market

Positioning, pricing, first-customer strategy, distribution. Built for your specific market — execution-ready for week one after the intensive.

DAY 6

Pitch & Narrative

Founder pitch deck, investor memo, website copy. The documents that open doors — written in your voice, ready to send by Friday evening.

DAY 7

Full Working Business — Tailored Only for You

Complete systems handover, full documentation, 30-day execution map. You leave with a running, independent business — built specifically around you. Nothing generic.

NEXT STEP

No Money Until I Show You What I Can Do

WhatsApp to receive a detailed questionnaire and NDA. I'll study your situation and show you exactly what the week would build — before you commit a single dollar.

A running business infrastructure

A tailored AI stack

A working product or specification

The full founder document kit

Hundreds of frameworks & workflows

A 30-day execution map

The week is the ignition. What follows is a specific, day-by-day action map for the first month — so the momentum doesn't stall on day eight.

12 Months of One-to-One Monitoring

Weekly 1-hour session for twelve months post-intensive — video call, voice, or collaborative working session, your choice. Direct access to Raj for accountability, course corrections, milestone reviews, and problem-solving as your business builds in real time. **Not a check-in. Active co-navigation for the full first year.** All 52 sessions scheduled on your calendar before the week ends.

Raj Singh. Founder of synARKa Intelligence and Artigellence (AAA). Twenty-five years self-employed across thirty-eight countries — visa consulting (12 years), agricultural operations, AI orchestration platforms, Indo-Pacific intelligence infrastructure. Everything built solo, shipped, on the record. This is not theory. **It is the pattern, applied to your business.**

You have an idea or early venture and need to compress twelve months of trial-and-error into one week. You want a builder in the room — not a consultant who sends a slide deck and invoices. You are serious enough to invest **A\$25,000 + travel costs** in getting it right from day one.
