

01 / 08 · THE OPERATOR AND THE PORTFOLIO

Thirteen ventures. *One operator.*

FOUNDER · AI ARCHITECT, ORCHESTRATOR & OPTIMIZER

Twenty-five years self-employed. Four industries. Thirty-eight countries. Now compounded into a working portfolio of **AI-orchestrated ventures** — solo-built, founder-direct, all live.

TODAY

Consulting cashflow. AAA by Artigellence — production-grade AI agents for Australian SMEs. Refundable Phase 0. Founder-direct delivery. The engine that funds the portfolio.

NEXT

Productised industry agent-packs. Every engagement hardens reusable IP — trades, clinics, accounting, legal, food distribution. Build once, deploy many.

LONG

Sovereign intelligence & evidence-graded commerce. synARKa — the Indo-Pacific Sense Engine. PEPHORMIA — peptides & hormones, honest by design.

PEPHORMIA — Whole-System Peptide & Hormone Platform

THE SIGNAL, NOT THE NOISE · EVIDENCE-GRADED · FOUR-TIER · THREE REVENUE STREAMS

Peptide & hormone science graded four ways — **strong, human, weak, mechanistic**. Three revenue streams. **Honest about limits, by design.**

pephormia.com

C · 01 · AAA BY ARTIGELLENCE · BREAD & BUTTER

The AI workforce for Australia's 2.5 million small businesses —
sold the only way SMEs buy: risk removed.

AAA by Artigellence builds production-grade AI agents that run the admin drowning Australian SME owners — quoting, invoicing, reception, reconciliation — sitting **above** the tools they already use (Xero, MYOB, ServiceM8, Cliniko), never replacing them. Consulting cashflow today; productised industry agent-packs next.

THE PROBLEM — QUANTIFIED & NATIONAL

14 hrs/wk lost to manual admin per Australian manager · Dext / ServiceNow 2025	\$30K / yr avg cost of late payments per SME · GoCardless 2025	76% of Australian SMEs have no AI strategy · National AI Centre 2025	2.8× faster growth for AI-using SMEs — the window is now · MYOB 2026
---	--	--	--

THE MODEL — PRICED PER PIECE, PAID ON
DELIVERY

Phase 0 — Diagnostic pilot	A\$4,500 · refundable
Phase 1 — Agent build (min 4)	A\$3,000 / agent
Phase 2 — Retainer	A\$1,750–3,500 / mo
Standard Year-1 client value	A\$56,500

All incl GST. Agents paid only on delivery.
Clients own everything — no lock-in. API run-costs
pass through at cost.

THE WEDGE — RISK REVERSAL

SME owners don't buy AI promises. AAA's entry is a **fully refundable A\$4,500 pilot** — first working agent on the client's real data by day 10, every dollar back through day 30 if it doesn't earn its place. The strongest risk-reversal in the Australian market: it converts the sceptical majority competitors can't reach.

WHY THIS SCALES BEYOND CONSULTING

- ◆ **Repeatable IP, not hours.** Every engagement hardens reusable industry agent-packs (trades, clinics, accounting, legal, food distribution) — build once, deploy many.
- ◆ **Solo-operator economics.** Founder-delivered with AI leverage: minimal fixed cost, services margins funding product development — not burning investor capital on overheads.
- ◆ **Distribution that compounds.** Accountants, bookkeepers, integrators sit on hundreds of SMEs each; partner tier turns them into a recurring referral engine.
- ◆ **Model-agnostic architecture.** Agents sit on abstraction layers — switching LLM providers is hours, not rebuilds. No platform dependency.

THE MOAT

- ◆ 25 years' regulated consulting — 4 industries, 38 countries — applied to AI delivery.
- ◆ Refund-backed delivery discipline: falsifiable, sourced claims only. **Trust is the product.**
- ◆ Australian-compliance-aware builds (Privacy Act, AHPR-adjacent workflows) — where offshore agencies stumble.

ONE ENGINE · FOUR REVENUE DOORS — A LADDER FROM A\$595 TO A\$56,500

01 · FINDABLE — ENTRY A\$595–1,950 AI-visibility & email-deliverability audits and fixes. Credits 100% toward Phase 0 — the cold-entry door.	02 · CORE — BUILD A\$4,500 → A\$56,500 Refundable pilot → agents A\$3,000 each → retainer. Standard Year-1 is the anchor — incl. Founder's Bonus, A\$7,000 value.	03 · GROWTH ENGINE A\$1,500–2,500/mo Weekly content, SEO+AEO, warmed outbound — recurring distribution revenue on top of the build.	04 · EXTENDED & BESPOKE 8 lines + tailored Diagnostics, strategy, integration sprints, workshops — and anything tailored-built to order: apps, dashboards, custom GPTs, digital clones, personal & family AI.
---	--	---	---

The unit maths: one Standard Year-1 client = A\$56,500. Capacity, not demand, is the constraint — a solo operator caps at 3–5 concurrent clients. **100 Standard clients = A\$5.65M revenue** — reaching it requires productised packs + delivery capacity. That is precisely what this raise builds.

THE FOUNDER-OPERATOR — WHY THIS FOUNDER, THIS MARKET

Raj Singh — Founder & Operator, Sydney. **25+ years self-employed across four industries and 38 countries**, including two decades of regulated migration consulting — high-stakes, compliance-heavy delivery sold on trust to exactly the settled, multi-business owners AAA serves today. That network is the warm pipeline.

4 INDUSTRIES

38 COUNTRIES

FOUNDER-DIRECT · NO JUNIORS

■ S · 01 · SYNARKA INTELLIGENCE · INDO-PACIFIC SENSE ENGINE

Seventy-two hours *before the world reacts.*

synARKa is the Indo-Pacific Sovereign Sense Engine — satellite, eight-engine AI consensus and twenty-five years of corridor knowledge, fused into a single sourced, decision-ready brief. Across mining, government, defence, agriculture and infrastructure, buyers are drowning in feeds, dashboards and satellite pixels — **too much data, not enough decision.** The synthesis gap is the universal pain. The answer is *insight, not pixels* — and the discipline throughout is **insight, never prediction.**

■ PROOF, NOT PROMISES — EVERY NUMBER SOURCED AND CHECKABLE

■ WHAT SYNARKA IS — THREE LAYERS, ONE ANSWER

- ◆ **Layer 01 · EO — Satellite · the eyes.** SAR · thermal · multispectral · hyperspectral. Surface proxies, not ore assay. Brokered tasking; no owned hardware.
- ◆ **Layer 02 · AI — Consensus · the swarm.** Eight-engine consensus, dissent preserved. Population agent-swarm scaling is Phase 2.
- ◆ **Layer 03 · INTEL — Corridor · the lens.** Twenty-five years of Indo-Pacific corridor knowledge, compounding daily — the uncopiable last mile.

■ THE MOAT — SIX THINGS. NO ONE ELSE HAS ALL SIX.

- ◆ **Sees from orbit** — SAR · thermal · hyperspectral · *V1.0 build*
- ◆ **Cross-examines 8 AIs** — consensus, not one opinion · LIVE
- ◆ **Simulates the reaction** — swarm of personas · *Phase 2*
- ◆ **Delivers the decision** — satellite + geo + market → answer · LIVE
- ◆ **Stays sovereign** — Australian · non-US/China · no lock-in · LIVE
- ◆ **Indo-Pacific minerals domain** — offtake · export-control synthesis · LIVE

The engine in one path: MOFCOM posts a dysprosium quota cut, 2am AEST → eight engines converge, two dissent on timing, flagged → cross-checked against customs notices and producer filings → **three exposed ASX names, calibrated — in the inbox 72 hours before the wires.**

■ ENGAGE — START WITH ONE QUESTION

Free first Insight or Audit	A\$0
72-Hour Brief — corridor question	A\$500
Site Baseline Audit — EO + context	A\$3,500–7,500
SiteWatch ★ — continuous monitoring	from A\$1,490/mo
Standing tiers — Watch → Operator → Pro	A\$99 → A\$15K+/mo
Sovereign / Government	POA

■ WHY SYNARKA, WHY NOW

- ◆ **A track record, not a pitch.** Every insight timestamped, calibrated and resolution-dated on a public ledger — misses published at equal weight to hits.
- ◆ **Founder-direct, every engagement.** You get Raj. No junior, no analyst, no account-manager handoff — at every tier.
- ◆ **The uncopiable last mile.** 25 years of corridor knowledge under an Australian sovereign lens.
- ◆ **Build once, swap forever.** Every component swappable — the orchestration is the moat.

"Satellite data is cheap. Frontier reasoning models are cheap. Raw intelligence is cheap. The last mile of context — translating commodity pixels into 'Zone B compressor is failing' — that is the moat. And it cannot be bought."

Raj Singh · Founder · 25 yrs Indo-Pacific corridor · Solo, AI-augmented · Founder-direct, every tier

■ THE POSITION — STRATEGIC PARTNERSHIP

synARKa is founder-held; equity is not for sale beyond 10%. A long-term sovereign asset — not a short-term exit vehicle. Conversations open with a small circle of strategic investors and operators who know the Indo-Pacific resources market. **Use of funds:** ship the v1.0 EO pipeline · analyst capacity beyond the founder · Phase-2 swarm simulation and Brier-scored calibration.

pephormia.com ● LIVE

Twenty-five years self-employed. *The record is the work*, not the role descriptions.

Operating thesis: the next decade rewards operators who ship — people who frame the system, build the working version, and iterate from data. The constraint on ambitious work is no longer tools, capital, or talent — it is *velocity between idea and running prototype*. I hold that interval to under one week, regardless of stack. Tool-agnostic, outcome-owned: no religious commitments to any framework, language or vendor — the right tool is the one that ships the result. Prose over decks, working systems over polished proposals, **falsifiable claims over narrative**.

01	02	03	04
Frame the system.	Build the working version.	Ship before the polish.	Iterate from data.

■ THE RECORD – CHRONOLOGICAL, MOST RECENT FIRST	■ CAPABILITIES – WHAT I ACTUALLY DO										
● 2026 – PRESENT Founder · synARKa Intelligence INDO-PACIFIC CONSENSUS ENGINE · RARE EARTHS · SOVEREIGNTY RISK Sole architect of the framework, signal feed, briefing layer and distribution. Cascade-probability methodology with hashed, falsifiable claims. Daily-run pipeline; public ledger at insights.synarka.pro; sovereign-grade briefings private.	◆ AI infrastructure & orchestration. LLM workflow design, multi-agent systems, retrieval pipelines. Gemini, Vertex, OpenAI, Anthropic, open-source stack. ◆ Content & intelligence systems. Briefing layers, structured-output pipelines, distribution. Concept to published artefact in under a week, repeatedly. ◆ Business operations & analysis. Process optimisation, workflow design — twelve years of visa consulting plus seven running clean P&Ls. ◆ Product development & rapid prototyping. Full-stack MVP shipping — cloud, local, low-code, no-code. Requirements-driven, never preference-driven.										
● 2024 – PRESENT Founder & Principal Architect · Artigellence (AAA) AI ORCHESTRATION PLATFORM · THE AUGMENTATION AGGREGATOR Built and shipped solo. Edge-AI orchestration over Gemini and Vertex; production at aaa.artigellence.com. AAA is the platform layer; verticals are the products — health, law, finance under active expansion.	■ THE TOOLKIT <table><tr><td>AI · MODELS</td><td>Gemini · Vertex AI · Claude · GPT · open-source LLMs · multi-model orchestration</td></tr><tr><td>BUILD · STACK</td><td>Python · Streamlit · GitHub · React (light) · HTML/CSS · Node (light)</td></tr><tr><td>ORCHESTRATION</td><td>Custom agent pipelines · retrieval pipelines · cascade-probability modelling</td></tr><tr><td>HOSTING · INFRA</td><td>Hostinger · Streamlit Cloud · Netlify · Cloudflare · DNS management</td></tr><tr><td>MODE</td><td>Solo founder · contract · remote · hybrid · advisory · founding team</td></tr></table>	AI · MODELS	Gemini · Vertex AI · Claude · GPT · open-source LLMs · multi-model orchestration	BUILD · STACK	Python · Streamlit · GitHub · React (light) · HTML/CSS · Node (light)	ORCHESTRATION	Custom agent pipelines · retrieval pipelines · cascade-probability modelling	HOSTING · INFRA	Hostinger · Streamlit Cloud · Netlify · Cloudflare · DNS management	MODE	Solo founder · contract · remote · hybrid · advisory · founding team
